TROUBLESHOOTING SPORTS PLUS ADDON FOR KODI

Make sure you DO NOT have BT smart setup, Sky Shield or Virgin Websafe Enabled. Go to the following link to find out how to disable any of these settings

https://droidbox.co.uk/how-to/uk-isps-blocking-content-how-to-remove-their-filters

Sometimes the kodi add-on can mess up, either due to accounts expiring or other things which kodi seems to keep in its memory, so it throws an Error.

If this happens try the following:

Check Your Account Status, make sure the account has not expired, you will still be able to enter the add-on but will get an error playing streams.

When accessing the add-on, if your not using a shortcut on the menu, make sure you go through Video Add-ons, NOT PROGRAMS. It will not work and you will get an error. If you are using a shortcut, make sure the shortcut is linked to the add-on in Video add-ons and not Program add-ons.

Clear cache, delete packages, exit kodi. Restart your router, by this I mean turning off the power to it for a few minutes. Start kodi back up.

If that still isn't letting you in the addon (or you've previously entered an incorrect username and password) then in kodi go to SYSTEM>>ADDONS>>MY ADDONS>>VIDEO ADDONS>MCKTV SPORTS PLUS>>CONFIGURE set defaults, and then re enter the correct username and password If you still having trouble then open a ticket on the website.

TROUBLESHOOTING MCKTV SPORTS PLUS ANDROID APP

Please see Installing Mcktv Sports Plus on Android and Fire TV through Kodi, at the end of the install instructions there are more problem solving tips

When entering the app for the 1st time, of you get a blank list then the chances are you have not entered your username and password correctly.

Go to settings, it's the option on the main menu with a cog. Click where it says MckTV Sports Plus and re enter your username and password.

Sometimes the EPG will not show information, again go to settings, main menu icon with the cog. Then select defaults and set defaults. Re open the app and re enter login details.

You can also go into settings, then to general and enter where it says EPG URL, <u>http://mcktv.co.uk/epg.xml</u> Also set it to download at each update from the drop down menu.
